Legacy Research Group is one of the largest independent publishing companies in the world, with two million readers in over 140 countries.
And congratulations!

You’ve made a smart decision to partner with Legacy Research Group.

For your convenience, we’ve created a collection of helpful tools to guide you... starting with this catalog. Consider it your Legacy Research handbook. In the pages that follow, we present all 13 Legacy Research experts – who they are... what they specialize in... what publications they write... And they're all organized alphabetically and by business.

So flip through this catalog of Legacy experts... find the ones you already follow... meet the ones you don’t know yet... and see everything your new Legacy Research subscription has to offer.

And when you’re done with that, make sure you check out this helpful table. It gives you everything you need to know about all our letters in one easy-to-follow grid.

Regards,

Kris Sayce
Editor-In-Chief

P.S. We also send a Weekly Wrap Up email to Legacy Research lifetime subscribers at the start of every week. It'll help guide you through everything we publish each week. So be sure to check your inbox for that on Monday afternoons.
From the beginning, independence has been the key to Legacy Research’s success. Unlike the mainstream press, we don’t make our money from corporate advertisers. And unlike Wall Street, we don’t take commissions or fees from the companies we cover in our newsletters.

Instead, we sell ideas, opinions, and recommendations.

What you see is what you get. There’s no more to it. Our mission is to provide readers with a broad view of the world. So, we ask questions. We research and test. But we do not claim to have the last word on every issue. We explore ideas with our readers... so they can decide for themselves.

That means we don’t have a one-size-fits-all approach to finance and investing. Each publisher under the Legacy umbrella has its own unique culture and outlook... Just like each of our readers has his or her own personal investing style.

Bullish or bearish... Conservative or speculative... Stocks, options, or cryptos... The common thread is great ideas.
Chris has been working as an analyst with Bill Bonner’s financial publishing firm, The Agora, since 2007. He is currently Legacy Research’s editor-at-large.

Chris heads up The Daily Cut, Legacy Research’s first daily e-letter, as well our as premium weekly e-letter, Inner Circle.

His mission is to keep you up to date with the latest ideas, insights, and recommendations from the Legacy team of analysts. He also frequently sits down to interview outside investors and big picture thinkers.

Over the years, he’s interviewed Marc Faber, Jim Rickards, Rick Rule, Frank Holmes, David Stockman, and Alan Greenspan... as well as dozens of fund managers, economists, and market analysts.

After graduating from Trinity College Dublin, Chris trained as a business analyst in London for international news agency Reuters, where one of his first assignments was looking into the Enron financial fraud.

He then worked as an investigative reporter in his native Dublin, where he covered Ireland’s “Celtic Tiger” real estate bubble.

The Daily Cut

*The Daily Cut* is the only place you’ll find all the top ideas, insights, and investment opportunities from rogue economist Bill Bonner, legendary speculator Doug Casey, former Wall Street insider Teeka Tiwari, master trader Jeff Clark, and their “brain trust” of analysts. For almost four decades, the founders of Bonner & Partners, Casey Research, Palm Beach Research Group, and Delta Report have been responsible for sending you independent financial analysis and recommendations from award-winning investors, traders who’ve managed millions of dollars, PhDs, advisors to the president and the CIA, and best-selling authors. *The Daily Cut* is the culmination of all that experience.

**CHRIS’ PUBLICATIONS**

**The Daily Cut**

**INNER CIRCLE**

*Inner Circle* gives you access to a group of experienced, intelligent, and outspoken investment experts. Many of these experts are based here in the U.S. But we also have teams in London, Paris, Bonn, Madrid, Beijing, Buenos Aires, and elsewhere. From high-yield investments to emerging markets, to aggressive resource and commodity plays... our people are on the ground, examining them firsthand and finding the best opportunities, wherever they are. Every week, editor Chris Lowe reads each report, research note, and recommendation produced by The Agora’s global council of experts. He then compiles the best information in an easy-to-read memo so that you’ll have only the very top ideas direct to your inbox.
Jeff Brown is a technology industry veteran with 25 years of experience. He was an executive at some of the most successful tech firms in the world – including Qualcomm, Juniper Networks, and NXP Semiconductors. And these days, he’s a formal advisor to eight early stage tech startups.

Jeff has built early stage startups. He’s run organizations generating hundreds of millions of dollars in annual revenues. And he’s been an angel investor in over 100 private companies, handing him estimated gains as high as 25,000%. As an active angel investor in early-stage technology companies, he has access to information the public never sees. He is on the front line, in the field, seeing things months, if not years, before the mass market becomes aware.

Jeff has a wide range of technology industry experience. From semiconductors to mobility, to broadcasting and video technology, to technology infrastructure, to IT networking, to IT security, to automotive and even consumer electronics... He’s also a member of the Chamber of Digital Commerce, which regularly advises the U.S. and foreign governments on blockchain technology. And he recently completed an invitation-only executive leadership program at the Yale School of management.

In short... he’s done it all.

Jeff’s Publications

THE BLEEDING EDGE

Five days a week, The Bleeding Edge guides readers around the cutting-edge tech trends of today and tomorrow. Jeff tells us what is shaping our future, explains what the mainstream media is getting wrong, and what investing trends need to be on your radar.

THE NEAR FUTURE REPORT

The Near Future Report is an investment advisory focused on identifying the trends of today at the point of mass adoption. With each issue, you’ll see Jeff’s knack for identifying companies best-positioned to profit from industry-altering trends. Jeff’s actionable recommendations on mid- to large-cap tech stocks will deliver steady growth and be safe enough for “family money.”
Bill Bonner founded The Agora in 1978. Since then, it has grown into one of the largest independent newsletter publishing companies in the world with offices in nine countries.

Bill isn’t a stock-picker. He’s not going to build a portfolio for you to follow. Instead, he shares insights and ideas about how the business and financial worlds REALLY work. He identifies big opportunities. He shows you where average investors are making big mistakes. He details opportunities he’s interested in personally, and what’s going on with his global business. In short, Bill opens a window to the world of the wealthy that you simply won’t find anywhere else.

In his daily newsletter, Bill Bonner’s Diary, Bill shares his decades of accrued knowledge about history, politics, society, finance, and economics. Sometimes funny, sometimes frightening – you’ll find his pieces always entertaining and packed with useful insight.

Bill Bonner, along with coauthor Dan Denning, write this monthly letter to convey their deepest insights on a wide range of macro- and micro-economic topics. This newsletter could only be written by editors like Dan and Bill. Bill is an economist, not a stock picker. And this newsletter won’t include a portfolio for you to follow. Instead, Dan and Bill share insights and ideas about how the business and financial worlds REALLY work. Every month, Dan and Bill lay out their contrarian thinking to show you insights you won’t find anywhere else. They’ll also share time-tested strategies to protect, and grow, your wealth no matter what happens with the government, the Fed, or the stock market.
Dan Denning is the coauthor of *The Bonner-Denning Letter*. Every month, he and Bill pen their contrarian thinking to provide insights you won’t find anywhere else.

In 1998, Dan founded and edited a private financial newsletter on small-capitalization stocks, leading over 35,000 subscribers to new investment ideas in dynamic American companies. Then in 2000, he became the editor of *Strategic Investment*, the flagship publication of internationally known Agora Publishing, where he analyzed markets from a macroeconomic and geopolitical perspective.

Before joining *The Bonner-Denning Letter*, he ran Southbank Investment Research, the leading independent financial publishing house in the UK. Dan’s belief in free markets, sound money, personal liberty, and small government have underpinned everything he’s done during his time in the financial publishing industry. In 2015, he relocated to London where he launched Southbank Investment Research, publisher of *The Fleet Street Letter*.

Tom Dyson is the author of Postcards From the Fringe and a contributor to Bonner & Partners’ flagship advisory – The Bonner-Denning Letter.

Tom bought his first stock when he was 11 years old. And he has been studying the art of investing and speculating ever since.

Tom graduated from the University of Nottingham in the United Kingdom. He is a member of the Chartered Institute of Management Accountants, one of Britain’s top accounting bodies. He also worked the bond trading desks at Salomon Brothers and Citigroup.

Before joining Bonner & Partners, Tom made a name for himself with his income-focused newsletter, The 12% Letter, one of the most popular advisories in America while it ran.

But he put that success aside in 2011 to co-found Palm Beach Research Group with wealth-building expert Mark Ford.

Every weekday, Tom shares his insights and his stories in his Postcards From the Fringe. He shows readers what he sees unfolding in the markets and the economy... as he travels the globe with his soon-to-be-wife-again and their three children. Their world tour has taken them from the Americas... to Africa... to Europe... and all across Asia.

Tom’s Portfolio is a new special-situation research advisory led by Tom Dyson. It’s designed to help you profit from Tom’s Dow-to-Gold ratio strategy. If you’ve ever wanted to know the thinking behind Tom’s personal decisions with his money... and what he recommends you do today... look no further than Tom’s Portfolio.
The Palm Beach Research Group is a publishing company unlike any other. Most financial advisories are little more than stock “tip sheets.” At PBRG, we guide you along the path to real, sustained financial prosperity. We do that by giving you a comprehensive wealth-building strategy.

We’re based in the heart of one of America’s “Millionaire Capitals.” And our team has access to some of the richest and most well-connected people in the world. We’ve studied the secrets the rich use to amass their fortunes… and uncovered their most important alternative investing ideas. And we don’t limit those ideas to just stocks and bonds. We also research options, real estate, private equity, and alternative assets like gold and cryptocurrencies.

Most importantly, our research is 100% independent. We don’t take money from any third parties to promote their services… no banks, no brokers, no dealers, no companies, etc. Our philosophy is a blend of conservative, income-based investments, asset protection, and smart speculation. It’s a time-tested approach you won’t find anywhere else.
Before joining Palm Beach Research Group, Jason spent nearly 20 years on Wall Street.

He began his investment career in 2001 at Cantor Fitzgerald on the 104th floor of One World Trade Center. Jason moved to Cantor’s London office just weeks before the September 11, 2001 terrorist attacks.

He spent a total of 12 years at Cantor, including the final eight years as a partner and head of equity derivatives North America. He then traded and sold derivatives and ETFs for Jefferies.

Since leaving Wall Street, Jason has launched two hedge funds and cofounded a quantitative investment research firm that provides multi-billion-dollar money managers with unique market insights.

Jason has been invited to speak at many conferences, including the Chartered Market Technician Association (CMTA), Better System Trader, and Future Money Trends. And his research firm has created two options courses for Investopedia Academy.

Jason is an avid musician, photographer, and loves science and space. He currently lives in Florida with his wife, three sons, and two rescue dogs.

Palm Beach Trader

*Palm Beach Trader* is a trade advisory service. Editor Jason Bodner’s readers are insiders on a stock-picking strategy built in the depths of Wall Street by industry veterans with decades of experience. It has identified the biggest winners of the past 28 years and trounced the major indexes like the S&P 500, Dow Jones, Nasdaq, and Russell 2000. His system for finding winners showed historical returns of 6,946%, 7,037%, and 7,438%. And his top 150 picks had average gains of 2,418%. This service delivers Jason’s best stocks with unusual institutional (UI) signals. These are stocks that big institutions are quietly getting involved in. His proprietary algorithms pinpoint those stocks as soon as institutions start scooping them up. But that’s just the first part. From those results, Jason sends his trade alerts only on the companies that have the best fundamental and technical qualities. All *Palm Beach Trader* readers have to do is hitch their carts to the massive winning stocks of tomorrow and ride them higher.
Teeka Tiwari is the editor of our flagship service The Palm Beach Letter, small-cap and cryptocurrency advisory Palm Beach Confidential, Alpha Edge, and Palm Beach Crypto Income Quarterly. A former hedge fund manager and Wall Street executive, he’s widely considered one of the world’s premier cryptocurrency analysts.

Teeka epitomizes the American dream. Growing up in the foster care system in the United Kingdom, Teeka came to the United States at age 16 with just $150 in his pocket and the clothes on his back. By 18, he had become the youngest employee at Lehman Brothers. Two years later, he shattered conventions by becoming the youngest vice president in the history of Shearson Lehman.

In 1998, he made a small fortune going short during the Asian crisis. But then, he “got greedy” (in his own words) and hung on for too long. Within a three-week span, he lost all he had made—and everything else he owned. He was ultimately compelled to file personal bankruptcy.

Two years after losing everything, Teeka rebuilt his wealth in the markets and went on to launch a successful hedge fund. After these events, he developed a newfound appreciation for risk. He made risk management his No. 1 priority. Today, Teeka’s personal mission is to help teach individual investors how to grow their money safely.

**TEEKA’S PUBLICATIONS**

**The Palm Beach Letter**
*The Palm Beach Letter* is an investment advisory and retirement newsletter that focuses on generating income both on and off Wall Street, investing in low-risk assets using an expansive asset allocation model, securing and protecting wealth, and living a rich and healthy life.

**Palm Beach Quant**
*At Palm Beach Quant*, Teeka uses a complex algorithm designed by a Lockheed aerospace engineer to target profitable options trades. These trades are fast... often just a few days or weeks. But they could help you generate hundreds – even thousands – of dollars per month in extra cash.

**Teeka Tiwari’s Alpha Edge**
Investing pros often talk about “Seeking Alpha.” That means choosing investments they hope will beat the averages. That’s what this service is all about: trying to give you the Alpha Edge. Teeka will share the strategies he used to reserve for the high-net-worth clients when he was a hedge fund manager. These are some of the smartest, safest, and most profitable investments in the world.

**Palm Beach Daily**
*Teeka Tiwari’s Palm Beach Daily* includes a team of analysts, traders, former hedge fund managers, entrepreneurs, and real estate developers. At the Daily, we share viewpoints you won’t find in mainstream media, from alternative currencies to off-grid assets. Every day, we give you techniques to help improve your financial situation and life.
As one of the first investing experts to explore cryptocurrencies, Teeka Tiwari is a financial pioneer. He recommended Bitcoin and Ether in 2016 when they were trading around $400 and $9, respectively. And that was just the start...

He’s since recommended more than four dozen cryptos, helping thousands of readers turn tiny grubstakes into veritable fortunes. That’s not just hyperbole...

Many of Teeka’s subscribers have even seen their crypto portfolios explode from as little as a few hundred dollars to over a million.

That’s why he gets messages every day, like this one... “Thank you again for all that you do. Without Teeka, we might never have been so blessed with life-changing gains. Thank you, Teeka, for changing our lives!”

It’s all part of Teeka’s two-pronged mission:

1. Help readers make money safely so they can lead a comfortable, dignified retirement.
2. Help make readers more financially literate so they can make better investment decisions and lead better lives.

**Palm Beach Confidential**

*Palm Beach Confidential* is our small-cap and cryptocurrency service. Most of the companies and cryptos we recommended in this service have market caps of less than $1 billion. Teeka is widely considered as one of the premier crypto analysts in the world. In this advisory, Teeka uses a strategy called “asymmetric investing,” which allows you to turn small sums of money into life-changing gains. Teeka has used this strategy to create one of the best cryptocurrency portfolios in the world.

**Palm Beach Crypto Income Quarterly**

In the stock market, there are two main ways to make money: capital gains and income from dividends. These two are completely different ways to invest. And each requires a separate strategy. The same idea applies to the cryptocurrency market. This unique service doesn’t only look for cryptocurrencies that appreciate in price... but also pay incredible dividends—so you can make income no matter what the market is doing.

**Palm Beach Venture**

Teeka shares the primary strategy he used to build his own fortune: investing in private placements. Thanks to Teeka and his hedge fund-caliber team, these 10x-40x potential investments are now open to ordinary investors.
Casey Research is a financial publishing company founded by legendary speculator and bestselling author Doug Casey.

For more than 30 years, Doug and his team have showed readers what’s really happening in the world... how to take advantage of market dislocations... and where to find the best ways to profit.

Casey Research offers a wide range of investments and speculations to grow your wealth. Their team of talented analysts focus on the sectors with significant upside potential. Investing in garden variety mutual funds or low-yielding money market funds will never make you rich. Investing in sectors with significant upside, on the other hand, can. And as a global leader in precious metals, mining, and resource investing, the team constantly scours the globe in search of the next big discovery.

Casey readers know that in order to make money in the markets, you need to go “against the crowd.” And this contrarian philosophy, along with Casey’s suite of popular research letters, have made them a lot of money over the years.
Doug Casey literally wrote the book on *Crisis Investing* that helps you build your own wealth empire in unprecedented times. A “master speculator” who, over the last 40 years, made mega-millions in global markets.

Dubbed the “International Man,” roughly four decades ago, Doug Casey has not only established residency in nearly a dozen countries, he’s visited 175 nations, and has been a major investor in businesses around the world.

He’s participated in several televised debates with presidential candidates and served as an economic advisor to the leaders of six countries. He’s been a regular guest on national television when people want to know what’s going on in the global financial markets—including spots on CNN, Merv Griffin, Charlie Rose, Regis Philbin, and NBC News. Phil Donahue even devoted an entire show to his work.

Today you’re most likely to find him at La Estancia de Cafayate (Casey’s Gulch), an oasis tucked away in the high red mountains outside Salta, Argentina. Cafayate most resembles the isolated beauty of Bryce Canyon, Utah combined with the lush vineyards of Napa Valley. Residents enjoy economic and social freedoms not found in the U.S. and some of the best wine and golf on the planet.

**DOUG’S PUBLICATIONS**

**The Casey Report**

Our flagship Casey Research publication – dedicated to helping individual investors of all levels grow and protect their wealth. Casey Research founder Doug Casey and Nick Giambruno identify powerful emerging trends ahead of the crowd, and guide you in taking advantage of the opportunities they create or defending your portfolio from the risk they present. Doug and Nick provide specific, actionable ideas designed to help subscribers make money in stocks, bonds, currencies, real estate, and commodities. Doug and his staff have an extraordinary track record of getting big picture calls correct... and helping readers make huge returns. *The Casey Report* will provide you with the knowledge and skills you need to build a lifetime of crisis-proof, inflation-proof wealth.

**Casey Daily Dispatch**

Six days a week, *The Casey Daily Dispatch* helps readers make sense of what’s going on in the economy and financial markets. *Dispatch* readers learn about the biggest money-making opportunities and threats to their wealth. Justin and his team are natural skeptics. They don’t listen to what the mainstream media is saying. And they pride themselves on taking on unpopular and controversial topics to let readers know what’s really happening behind the scenes. Readers will also frequently hear from bestselling author and world-renowned speculator Doug Casey on everything from technology to politics to exciting “crisis investing” opportunities. On Sunday, *Dispatch* readers receive a quick review of everything that was published the week before to help stay updated on all of our latest ideas.
Dave Forest is a geologist who has worked professionally in mining and petroleum over a 20-year career. He has also bridged his technical expertise into the finance and investment sector, originally joining Casey Research in 2004 when he founded the Casey Energy Speculator, dedicated to finding high-potential investment opportunities in oil, natural gas, uranium, and renewables.

He also founded his own mineral exploration and development companies, raising over $80 million in equity financing from some of the most well-known resource investors in North America.

His past successes include the development of a 10-million-ounce gold deposit in Colombia, as well as becoming the first to be granted a modern exploration license in the emerging economy of Myanmar, Southeast Asia.

He also served as Managing Director of Notela Resource Advisors, an advisory firm analyzing and designing global investment opportunities in the natural resource sector.

Dave continues to travel extensively reviewing resource projects and investment opportunities. In 2018, he took the reins of Casey Research’s premiere commodities investing advisory — International Speculator.

For over a quarter of a century, International Speculator has been dedicated to presenting speculative opportunities to investors looking to diversify into small-cap international resource opportunities, including junior U.S. and Canadian gold and silver exploration companies. Editor Dave Forest and team unearth the most undervalued explorers and mining stocks around the world. International Speculator is your ultimate guide to profiting from commodities. Every month, you’ll read all about Dave’s findings, including the incredible developments happening in commodities around the globe. See for yourself why we are widely considered among the world’s foremost base and precious metals investing experts.
Nick Giambruno is Doug Casey’s globetrotting protégé. He’s also the Chief Analyst of Casey Research’s flagship advisory, *The Casey Report* and its premium “value investing” advisory, *Crisis Investing*.

Nick knows that the best time to buy—as Baron Rothschild correctly observed—is “when there's blood in the streets.”

He writes about geopolitics, value investing in crisis markets, the global cannabis market, international banking, second passports, and surviving a financial collapse, among other topics.

In short, Nick’s work helps people make the most of their personal freedom and financial opportunity around the world.

Born in Minnesota, he's lived in Europe, South America, and the Middle East, including Beirut and Dubai, where he covered regional banks and other companies for an investment house. Today, Nick spends most of his time in Buenos Aires, Argentina.

Nick is a frequent speaker at investment conferences around the world.

---

**The Casey Report**

Our flagship Casey Research publication – dedicated to helping individual investors of all levels grow and protect their wealth. Founder Doug Casey and Nick Giambruno identify powerful emerging trends ahead of the crowd, and guide you in taking advantage of the opportunities they create or defending your portfolio from the risk they present. Doug and Nick provide specific, actionable ideas designed to help subscribers make money in stocks, bonds, currencies, real estate, and commodities. Doug and his staff have an extraordinary track record of getting big picture calls correct... and helping readers make huge returns.

**Crisis Investing**

Every month, legendary crisis investor Doug Casey and his globe-trotting protégé, Nick Giambruno, will scour the world looking for the best crisis-born opportunities for you from fundamentally sound businesses whose stock prices have been hammered down by fear, crisis, and politically caused distortions. Nick and Doug take a contrarian view of the world’s most beaten-down assets and regions in search of incredible “blood in the streets” value investments. And their track record speaks for itself.
E.B. Tucker has been profiting from crises for years. In early 2009, he realized that the U.S. housing bust would create a generation of renters. He raised money and bought a large portfolio of single-family rental houses at rock-bottom prices... as low as 10 cents on the dollar.

E.B. was also a founding partner and managing director of KSIR Capital Management, an investment firm focused on gold and silver equities. He knows the gold and silver business inside and out, having visited mines in over a dozen countries.

Prior to joining Casey Research, E.B. was co-editor of Stansberry International and a research analyst for Porter Stansberry’s Investment Advisory. While there, he dedicated his work to digging into the fundamentals of great companies trading at cheap prices.

And before launching his newest advisory, Strategic Investor, E.B. was the editor of Casey Research’s flagship publication The Casey Report. Working hand-in-hand with Doug Casey for three years, he traveled extensively following global trends to find the next great speculation.

In 2018, E.B. launched his own advisory — Strategic Investor. And this year, he’ll launch his newest exclusive service Strategic Trader.

E.B.’S PUBLICATIONS

E.B. Tucker’s Strategic Investor

The strategic investor always has a plan of attack. His strategy involves 4 steps: 1) Assess 2) Consolidate 3) Position 4) Speculate. Doug Casey wrote the book on Strategic Investing in 1983. We touch on several key points he laid out back then. Most importantly, we make some crucial updates for today’s market. Right now, there is a huge shift happening in the markets...huge distortions that we are ready to take advantage of. Our advice allows you to emerge a victor from the financial battlefield of the future.

Strategic Trader

There’s a war being waged against your financial future. Market crashes, inflation, deflation, high-speed supercomputers, and Wall Street insiders are trying to get between you and your money every day. But E.B. Tucker sees serious opportunity in the years ahead. An era where strategic traders will make a killing. The era of “easy money” is over. And it’s more important than ever to be selective in your investments. You need to have a true game plan – and multiple ways to profit. Passive investors will get crushed, but Strategic Traders will thrive. And with our proven system, we’ll come out on top no matter what happens in the markets.
MORE FROM OUR PARTNERS

JEFF CLARK TRADER

THE OPPORTUNISTIC TRADER

ANDY KRIEGER TRADING
Jeff Clark is the editor of several investment advisories which focus on profiting from options in any market environment.

Jeff began writing newsletters after retiring from his independent, San Francisco-based brokerage house and private money management firm at age 42. Before that, Jeff developed the curricula for an international MBA program and founded an investor education firm. Now, Jeff takes the same strategy he used for his clients – around 100 of California’s wealthiest individuals – and exclusively shares these techniques with his loyal subscribers.

Jeff’s strategy allows you to potentially make money no matter what a stock does – whether it goes up, down, or just stays the same. That’s what makes him one of the best traders around. And his track record can attest.

Since 2005, subscribers have had the opportunity to make triple-digit gains over 50 times and double-digit gains more than 160 times. He continues that success with his suite of services for new and experienced traders.

**JEFF’S PUBLICATIONS**

**JEFF CLARK’S MARKET MINUTE**

In Jeff’s free e-letter, he provides timely market commentary and actionable trading ideas two hours before market open. The strategies and commentary are both conservative and speculative, designed to help readers take advantage of short- and sometimes intermediate-term market moves.

**JEFF CLARK’S DELTA REPORT**

Here, Jeff builds on the trading foundations laid in Jeff Clark Trader, providing readers more speculative and advanced option trading opportunities with more frequency, and higher return potential. This service also includes special reports like The Crisis Trading Blueprint and Spotting the Perfect Trade.

**JEFF CLARK TRADER**

Jeff’s flagship advisory, where he shows traders how to fund a comfortable retirement trading just three stocks. As his introductory options service, he offers option trading fundamentals and lower-risk trades to teach investors the power of using options to amplify their returns.

**THE BREAKOUT ALERT**

In the Breakout Alert, Jeff Clark looks to profit on explosive upside moves in small-cap, low-priced stocks. Using a specific signal that foretells big stock breakouts, Jeff offers readers the chance to multiply their investments in a matter of months.
Larry Benedict, a graduate of Syracuse University, has over 25 years of experience as an investment professional. In 1984, he began his career as a market maker in equity derivatives products on the floor of the Chicago Board of Options Exchange. Later, Benedict worked as a market maker on the American Stock Exchange and, in 1989, was hired by Spear Leeds & Kellogg (SLK) as its options specialist in the XMI Major Market Index on the American Stock Exchange. After the Goldman Sachs purchase of SLK in 2000, Benedict launched Banyan Equity Management, LLC.

The Opportunistic Trader is the culmination of Larry Benedict’s 35-year trading career. Using simple, easy-to-understand trading plays, Larry helps everyday investors benefit from the secrets that made him a multimillionaire.

It’s the best way we know of for the little guy to access hedge fund-level strategies, and consistently market-beating returns. And it’s the day trader’s most essential resource during volatile times.

This publication is a weekly options advisory written by 30-year trading veteran Larry Benedict. Alongside specific option trade recommendations, Larry provides invaluable trading resources and a rare look at his rolodex of mega-successful industry contacts.

Subscribers have access to not only Larry’s latest trade recommendations, but an extensive network of trading industry professionals, exclusive trading resources, and regular updates on Larry’s market forecasts and current portfolio positions.
Andy Krieger claims the honor of being one of the top traders in history. Revered in trading circles for his famous trading “breaking the Kiwi”, where he made millions shorting the New Zealand dollar, Andy has cemented his legacy in the trading world. But trading hasn’t always been Andy’s main aspiration. In college, Andy studied Sanskrit, Bengali, Hebrew, and eastern philosophy, aiming to become a professor of Indian philosophy. He continued those studies later in life, as a world traveler and publisher of philosophical works. But shortly after college, Andy decided to pursue a business degree and, before long, found himself at his first trading job at a JP Morgan trading desk in Delaware.

What proceeded was a rapid rise to the top ranks of traders around the world. From JP Morgan, Andy went on to work at Banker’s Trust, Solomon Brothers, and eventually was chosen to become successor to George Soros’ Quantum Fund... making hundreds of millions of dollars in trading profits along the way. But in 1988, Andy abruptly left Wall Street to spend more time focusing on his family and his passion for eastern languages and philosophy. Nowadays, Andy’s goal is to train a group of apprentices on how to best take advantage the highly lucrative currency markets... Providing the resources to turn every novice into an expert, and regular trade ideas to further hone their skills.

In his Money Trends e-letter, currency trading legend Andy Krieger helps you navigate the key events and factors that influence every market. His mission is to help you become a better trader – even if you’ve never touched the lucrative foreign exchange (or “forex”) markets before.
